Subject: Woodside Mining proposal

Dear Minister, Having been concerned enough to attend the community consultation meeting at Woodside recently, I wish to state the following.

1. It is blatantly obvious that the community is dead against the proposal to mine at Woodside. Many reasons stated, including destroying the current tourism and beauty of the area.
2. Noise from blasting
3. Noise from many extra trucks along already struggling roads
4. Destroying or at least risking the underground water system that this area relies on for vineyards etc
5. Risking tourism jobs, as nobody wants to visit a mine area
6. Dust emissions

Also, I am disgusted that these mining bully boys, who do not have to answer to the Adelaide Hills Council, have been allowed to stop the Bird in Hand Winery proposal for extensions to the winery.
What a vastly unfair, and one sided playing board does this stink of.

You are not fooling anybody by thinking you can sit on the fence with this mining proposal. The community fears that all that will happen with this so-called community consultation, is that YOU will go back to the mining group and they will attempt to address their stats and the bloody thing will get approved, just to boost the SA Govt economy stats.

THE COMMUNITY HAS CLEARLY SAID NO, SO HAVE THE GUTS TO SO NO ALSO!
