Subject: mining lease proposal (MC4322) Nain Rd

To Mr Mark Howe,

I am writing to you in concern with the mining lease proposal (MC4322) Nain Rd, Greenock.
My name is Charmaine Holland, granddaughter of Stojan Petrov I live in the small community of Nain with him which is only 1.5km away west from the proposed site and I am concerned about all the dust that will be generated by the mine as my grandfather and myself suffer from respiratory issues and need to have Ventolin daily and most of the breeze comes from the south west direction which in turn blows the fine particles in our direction. I had to rush him to hospital 3:30am last month because he found it difficult to breath and to have extra dust added to what we already have is not going to help at all! He also suffers with dementia and recently has had a pacemaker and I am worried that the blasting and noise will upset him greatly.

I am a full time carer for my grandfather and have lived at [REDACTED] Nain for more than 30 years with him. He bought this land knowing this area will be untouched by community growth and industrial growth and could enjoy his retirement in the peaceful community of Nain. Never did he expect a mine to be proposed for down the road and speaking on his behalf, he is shocked! In turn we the locals here at Nain also feel and believe that the value of all our property's will drop and are very concerned with our homes and the vibrations that will be created from the blasting.

We do not see the mine from our dwelling but we can see the proposed mine site from the top of our hill which is where we get a lot of visitors come here just to see and take photos of the view from on top of our hill. To have that spoiled by a mine would be very disappointing.

I am also concerned about all the fauna here in the Nain hills. We have kangaroos, echidnas, birds, etc and I am also afraid that the blasting will be felt and heard by them and could cause them to change habits.

This letter is to express our concern and to let you know that we strongly oppose to the development of the mine.

Kind Regards,

Charmaine Holland (also speaking on behalf of Stojan Petrov)
