Subject: Woodside Mine

My name is Geoff Weaver. I have a vineyard in the Adelaide Hills and I am concerned about the potential impact of mining at Woodside.

We need to consider costs and benefits here.

The cost to;

water supplies

noise including blasting and trucks

tourism

Benefits

profits to Terramin

employment.

We need to quantify the costs and benefits but I think the answer will come out that costs are far greater than benefits.

I have personal experience of working co-operatively with Boral on our Southern boundary with liaison with PIRSA but fear that this proposed mine is a much higher level of intrusion, disruption and damage.

Please let me know the outcome of the discussions.

Kind Regards

Geoff Weaver
