

Mr Mark Howe,
DEMITRE.

5th November, 2013

Tim & Rosemary Crowell,

PRICE S.A. 5570

We would like to lodge my concerns about the proposed Hillside Mine. As the copper ore will be stored at Ardrossan next to the grain that myself and other farmers on the Yorke Peninsula produce. I would not like to see this grain become contaminated with this copper ore by accident, direct use of the same port facility, vandalism, leakage weather conditions or any other unforeseen circumstances.

If this situation were to happen who would be liable, Rex the Government or will we the grain produces have to wear this. As you would be aware ~~Ardrossan stores millions of dollars worth of grain. Who will pay??~~

The other concern is my property value will be decreased when the rezoning from rural production to mine extraction. Hence losing my equity. The bank won't like this.

The road change will also add travel times to our produce up and down the Peninsula adding more penalties to our grain.

Grain growing on the Yorke Peninsula is a very reliable proven industry.

Rex Minerals have no mining experience and are yet to be proven. Please don't destroy a proven industry.

Thanks

 
Tim & Rosemary Crowell
