message	<p>I am writing in response to the proposed hillside mine near ardressan. I am not sure if this is the correct place to write to but as the deadline is the 24 th October I thought I had better try. I am writing to formally oppose the mine at hillside. I am not a landowner or stakeholder in any way but simply a resident of nearby maitland and concerned that the hillside project, should it go ahead, would open the door for further mining in the north of yorke peninsula. Whilst I am aware that comment is sought on the hillside proposal only, information suggests that once the hillside site is up and running it will create opportunity to access and develop future sites, one in particular near to ardressan, that may hold an opportunity for the company to reap the added benefits of mining uranium as a by product of copper mining. I am aware that the opportunities that exist for the sa government in terms of supporting the mining industry in the yorke, mid north and braemar valley areas are a major boost for the state economic future, however, my concern is for the communities involved and that the development of the hillside venture is just the beginning for the yorke peninsula. I thank you for your time and consideration</p>
