**Subject:** Terramin's Woodside Mine

Hi,

My name is Kayla McElwee and I am a regular tourist in the Adelaide Hills wine region. It has come to my attention that there is a Submission being considered to create a new Gold Mine in Woodside.

Whilst I understand the need to mine, I am more concerned about the impact it will have on the water supply, the pristine environment, disruption to local wineries and businesses, which are a major draw card for Adelaide and our country.

There is no requirement for the mine to go ahead other than to disrupt the environment, dislodge the locals who own and operate business and family properties and who have supported the country and Adelaide with their tourism. Is that what you want to happen?

There is no way testing can adequately predict the impact of underground blasting on the aquifer system. The only way to ensure the security of the water is to stop this mine from going ahead. There are further concerns regarding the 24 hour truck movement.

Please reconsider granting this approval for Terramin's application. Our country needs to move away from destruction and towards a better, balanced way of life.

Kind Regards,

**Kayla McElwee**
