Dear Mark,

**Re: Proposed REX Minerals Mine.**

I am writing to advise you we are against any open cut mining on the Yorke Peninsula and therefore are against Rex Minerals current submission to mine.

We live in Ardrossan and own a professional farm consultancy business called "Team Wiss Pty Ltd" working with many farmers mainly on central YP. The geographical area REX are looking to mine and for future expansion will affect many of our clients and reduce the farming area we currently advise on therefore dramatically reducing our income to a point where our business will not be viable and we will have to cease operations. Our qualifications and experience are in Agriculture not mining. We cannot relocate our consultancy business, it has taken over 10 years to get farmers confidence in us and this would not be financially possible if starting in another farming district. This year we have contributed to local sporting clubs and community events donations of just over \$10,000.00, we would have to stop doing this which will also affect the local community at large. We plan to run our successful business advising farmers at its current status for many years past the mines life and we have two children that may want to continue the business well into the future.

**We cannot see any benefit to ourselves, the residents of the Yorke Peninsula and the hundreds of thousands of people who visit and enjoy it every year. We do not want to see the mine eventuate.**

Kind regards

Craig and Cindy Wissell
