To Business Support Office  
D. E. M. - Mining Regulation

Bird In Hand Gold Mine Submission.

We farm beef cattle along Harrison Road and in consideration of requirements imposed upon us to meter our 4 existing irrigation bores, because of Government fears of over use of underground water and contamination of Adelaide's water, we find it astounding that a underground gold mine in the Mount Lofty Ranges can be even considered.

Despite Terramin's assurances of being able to drill, blast and separate underground water with cement grouting safely, without contamination we worry that this type of mining in a built up area seems to be untested elsewhere and puts our Adelaide Hills Aquifer at risk.

Regards Bryce and Janet Harrison
