## PART 5 - GUIDANCE TO ASSIST WITH THIS FEE SCHEDULE:

### **Single or Multiple Tenement Programs:**

- Fees for standalone PEPRs for Miscellaneous Purposes Licences (**MPL**) will be set at the fee that would be payable for the primary associated production tenement.
- Only one fee will be charged where an operating plan relates to multiple tenements (PEPRs and/or MOPs).
- Where an operating plan for a Private Mine (**PM**) is combined in a single document MOP/PEPR with related production tenements and adopts a PEPR (rather than MOP) standard, the fee for the first single document MOP/PEPR will apply.
- A subsequent review of an approved single document MOP/PEPR will follow the PEPR Review fee structure.
- PEPRs which combine more than one tenement type (e.g. ML, EML, MPL, RL (excluding PMs)) will incur the fee equivalent to the primary associated production tenement.
- PEPRs which combine newly granted production tenements with existing tenements (where the existing tenements already have an approved PEPR) will incur the first PEPR fee applied to the entire operation (excluding Private Mines).

### **Change in Operations**

- A Change in Operations application that relates to s56Q(3)(b) (i) or (iii) only (and does not require a change to authorised operations) is considered an administrative assessment and a lower fee is applied.
- A Change in Operations application in accordance with s56Q(3)(a) or s56Q(3)(c) relates to a change to authorised operations and is likely to involve an environmental impact assessment, hence a higher fee is applied. Where s56Q(3)(a)/(c) and s56Q(3)(b)(i) or (iii) are relevant to the same application, the higher fee applies.
- The department has discretion to vary the fee for a revised PEPR submission that immediately follows a Change in Operations application approval.

### **General Guidance:**

- Fees will not be charged twice for a single PEPR, PEPR Review, Initial MOP or MOP alteration (i.e. outstanding matters or information requests being resolved for the same program scope).
- Fees apply for PEPR Reviews initiated by the tenement holder or directed by the Minister for Energy and Mining under sections 70C and 73G(4) of the *Mining Act 2031*.
- Where annual production rate is used to determine the PEPR or MOP fee, the production rate will be the annual production rate stated in the PEPR or MOP submission.
- To determine the Mineral Lease PEPR Review fee, the larger of the approved PEPR Rehabilitation Liability Estimate (**RLE**) or Bond will be used. If there is no current approved PEPR RLE or Bond applicable to the tenement, the proposed PEPR RLE in the PEPR submission will be used.
- Information on when a review of an exploration PEPR (**E-PEPR**) can be submitted is outlined within frequently asked questions available at <https://www.energymining.sa.gov.au/industry/minerals-and-mining/forms-legislation-and-guidance> and is published in the Department's [Minerals Regulatory Guideline MG22: Guidelines for conducting mineral exploration in South Australia](#).
- [Unique scenarios](#) will arise from time to time - the Minister for Energy and Mining or delegate has the right to reduce or waive fees on merit.
- A fee calculator is available at the Department's website: <https://www.energymining.sa.gov.au/industry/minerals-and-mining/forms-legislation-and-guidance/fees-and-calculators>.
