Issue	I have no issue with the mine proposal. I believe that the impact will be minimal.
Reference and page number (if known)	
Comment	I believe that it will provide employment in a time of relatively high unemployment. The hills area is not pristine as claimed by many residents. I can take people around or publish photos of ugly derelict buildings in the hills. Water is over emphasized. I have a bore on the property that I can not use. The salinity is 4000 + parts per million which renders it useless to even use it for the garden. The area of Woodside is not a high tourist destination. From time to time there are events that may be a bigger public nuisance. Rather provide employment than using the tax I pay to fund people sitting at home doing nothing. I am all for development of industries and adding value to grow the area and country.
