

Install and Commission an In Home display Unit (IHD): Residential Only	Activity No.
	IHD1

1. ACTIVITY SPECIFIC DEFINITIONS

In home display Unit: A visual display device that provides feedback on electrical energy use in real time. Devices may also display cost of energy used, and estimates of greenhouse gas emissions

Advanced Metering Infrastructure (AMI): an electronic device that records consumption of electric energy in intervals of an hour or less and communicates that information at least daily back to the utility for monitoring and billing. Otherwise known as a “Smart Meter”

2. ACTIVITY DESCRIPTION (SUMMARY)

Install and commission an In Home Display unit (IHD) to a residential building

3. ACTIVITY ELIGIBILITY REQUIREMENTS

Any residential household in South Australia where the installed product requirements and minimum installation requirements can be met.

4. PRODUCT REQUIREMENTS

- (1) At the time of installation, the new lighting equipment must be on the list of products accepted for installation under the Victorian Energy Efficiency Target Scheme and be included on the VEET Product Register.
- (2) Provide a minimum 2 years replacement warranty.

5. MINIMUM INSTALLATION REQUIREMENTS

- (1) The activity must be performed by a licensed electrical worker under the supervision of a licensed electrical contractor.
- (2) The installer must provide the householder with training in the use of the full range of features available from the IHD at the time of commissioning.

6. ACTIVITY ENERGY SAVINGS

The normalised energy saved per household for this activity = 6.1 GJ

7. GUIDANCE NOTES (INFORMATIVE ONLY – NOT MANDATORY)
