Good Afternoon,

This project is currently taking submissions which seem to be for negative impacts. Is there a way of submitting our thoughts/agreement with some of the potential positive outcomes that have been documented in the submission?

We need to get the state moving. Why not get another business started (back up and running)! This has potential to lead to move projects throughout SA I am reading.

Many thanks,

Michael

Good Morning,

More public concerns are being posted to social media and frustratingly gaining support. My concern is that a lot of the hype is unfounded commentary. As a state we absolutely need to invest in what we can to keep it moving. We also need to take into consideration the mum and dad investors that will be concerned that significant investment on Terramin's part has been afforded to appease concerns, which is seemingly not being taken into account.

Again, unfounded concerns and opinions should not influence decisions with regards to this mine. Hopefully a mine like this encourages more investment in our state.

Thank you,
