I understand that my submission will be published on the DEM website and provided to the applicant, but I require that the government withholds my name and contact details. I understand that it is my responsibility to ensure personal information is not included in the body of my submission, any footers or headers or any attachments	checked

Submission details

Issue	Noise
Reference and page number (if known)	
Comment	The EPA sets the maximum sound levels that are permitted to emanate from the mine site. However there is no consideration or control over the CONSTANT noise, 24/7, 365 days of the year, multiplied by any number of mining lease extensions that Terramin is envisaging. Sound carries significantly depending on the landscape , especially if one is resident on a close ridge. Noise amplifies upwards and over gullies. It is IMPOSSIBLE to eliminate the constant noise drone that an operational mine would subject us to. The resale value of our property would be drastically affected as there is no off switch for us to use during inspections. It was quite distressing when a bore hole was drilled, but the noise STOPPED. How do we live our lives if the noise never stops. It is disastrous to establish a mine site within such a tranquil enviroment.
