Subject: Opposition to proposed Hillside mine.

To who it may concern.

As a young farming family we are opposed to the proposed Hillside mine being given the go ahead. The area being considered for the mine is and is surrounded by prime agricultural land which we fear will be contaminated by dust from any mining operation which is carried out. The clean green status of the crops grown in the area will be compromised should mining be under taken. The contamination may also extend to the nearby marine environment and may even reach as far as the grain handling facility at Ardrossan. We feel that the production of safe to eat food is more important than a short term mining project that could leave long term pollution problems in one the most reliable and productive agricultural areas in Australia.

Your sincerely,
Lynton. Alex, Craig and Deborah Wakefield.
