# Penrice Mine

<b>Resource</b>	Limestone aggregates
<b>Company</b>	<a href="#">Adelaide Brighton Cement Ltd</a> ( <a href="http://www.adbri.com.au">http://www.adbri.com.au</a> )
<b>Status</b>	Operating

Penrice Quarry, Angaston currently consists of 5 active mining tenements - ML 6233, PM 8 120, MPL 118, and MPL 75

<b>Mining operation</b>	<ul style="list-style-type: none"><li>• Produces raw stone for cement manufacture, aggregates, chemical grade limestone and production material for foundry flux, glass and paver manufacture</li><li>• 900,000 tonnes of material was produced from the site in 2016</li><li>• The remaining resource is currently under assessment following a drilling program in 2017</li><li>• A MOP/PEPR update is due for the site in 2018</li><li>• It is estimated that 75.8 Mt in situ marble (of all grades) and 11.6 Mt waste will be produced from the pit</li></ul>
-------------------------	---

More information on production material is available on the [Adelaide Brighton Cement Ltd website](#)

(<http://www.adbri.com.au>)

<b>Location</b>	2.5 km north of Angaston
-----------------	--------------------------

<b>Resource estimates and production estimates</b>	Production statistics are available from <a href="#">Operating mines and quarries of South Australia</a> ( <a href="https://sarigbasis.pir.sa.gov.au/WebtopEw/ws/samref/sarig1/image/DDD/ISM38.pdf">https://sarigbasis.pir.sa.gov.au/WebtopEw/ws/samref/sarig1/image/DDD/ISM38.pdf</a> )
