Subject: Mining Lease Proposal MC 4322 'Dolomite Deposit' - Nain via Greenock.

Attn Paul Thompson / Mark Howe:

We have read all the extensive mining proposal information on the website :

http://www.minerals.dmitre.sa.gov.au/public_notices/mining_proposals_open_for_public_comment/kara_resources_dolomite_depo
[sit](#)

"For public comment"

Quite simply, we object to

the mining lease proposal application.

We have lived here for 32 years

and chose to live here because of the beautiful quiet location. Our original bluestone home is 160 years old and is locally heritage listed. T

o

now

have a mine

plunged

upon us (and the neighboring residents) is inconsiderate to this small settlement.

We personally are in the midst of a major building extension to our home and also have solar panels installed. We do not wish have this compromised by the dust or vibrations from a fully operational quarry a short distance away.

To have our locally heritage listed churches, homes and properties de-valued due to th

e

mine

and to have our peace and

tranquility

, flora and fauna destroyed by blasting, noise associated with the site, truck and vehicular movement and dust (be it the dust

from the mine or from the extra traffic

we

envisage

also to the eastern part of

Nain Road) is a complete inconsideration to us.

The dust and destruction to the road from semi's & B-doubles during crop harvesting over

the summer months

is already enough to contend with and our concern is also for the safety of drivers who are unaware of the perilous gravel road conditions from Greenock to Nain.

We look forward to your response, y
ours sincerely.

Charmayne & Anthony Schulz
