Subject: Bird in Hand Gold Mine

To Whom it may concern

I am a past resident of Woodside Road and formerly had a water licence that would have been impacted by the proposed mine

However my greatest concern is road safety with an additional 24 heavy trucks per day on fragile country roads will drastically increase wear and increase safety issues at the already congested (and known black spot) Nairne/Woodside intersection. This increased risk to safety is unacceptable and is just one of the reasons why the mine should not be allowed to proceed.

I know the risks of this road only too well with a former staff member of mine losing his life on this stretch of road and I was the one notified by Police and had to inform all his colleagues of his death. This remains one of the most traumatic times of my life and I cannot see why anything that would increase the risk of more family's going through what David's did should be approved

Best regards

Richard Gunner
