Dear Mr. Howe,

RE Rex Minerals' Mining Lease Proposal for the Hillside Copper Mine, Yorke Peninsula

I, Louise Taylor, am aware of Rex Minerals' mining lease proposal to establish an open pit copper mine at Hillside on Yorke Peninsula near Pine Point. I understand that proposed mine will cover an area of approximately 3,000 hectares and will comprise: an open pit 2.4 kms long by 1 km wide by 450 metres deep; three waste rock piles, the highest reaching 115 metres; a large crushing, grinding facility; a flotation and magnetic separation processing plant; a large tailings dam to hold processing by-products; two 12 km pipelines to carry the ore concentrate to Ardrossan and return seawater to the mine; a filtration plant, storage sheds, water storage ponds and a seawater intake system at the port; major road realignments of the Yorke Highway and Minlaton turn-off.

I wish to lodge my objection to this mine development proposal because of the following:

- Loss of prime agricultural land
- Detrimental impact on tourism and associated loss of tourist dollars
- Inappropriateness of locating a mine of this size in a populated rural area, within close proximity to towns and holiday settlements
- Detrimental effect on people, crops and stock from exposure to hazardous dust. Dust map/models not done on current mine plan
- Groundwater contamination and lowering of the water table. Depth will be 450m, model data only to 205m depth
- Contamination of St Vincent's Gulf and its marine life. Lack of Gulf St Vincent impact studies
- Health impacts associated with exposure to contaminated dust, constant noise, contaminated rain water tanks and sleep deprivation.
- Uranium level of 200ppm of grave concern, when new standard is going to be 80ppm.
- Noise pollution. Noise map models not done on current mine plan.
- Visual pollution
- Vibrations from blasting a least once every two days. Will this have an impact on coastal cliffs as well as surrounding area?
- Inadequate provision for rehabilitation of mine site, resulting in long-term irreversible damage to environment. Where is rehabilitation plan? Need absolute guarantee that the land be returned to viable and useful farming land.

- Risk that local community will be left with huge clean-up bill if the mine closes prematurely
- Devaluation of surrounding properties including agricultural land and coastal residences
- Creation of hazardous road junction at proposed Minlaton diversion at Pine Point
- Increased heavy vehicle traffic and road damage for the life of the mine
- Lack of effective community consultation and transparency
- Damage to social infrastructure
- Detrimental impact on flora and fauna
- No contingency plan for spillage of copper concentrate into the gulf.

I therefore petition DMITRE to disallow this proposal and I look forward to a favourable consideration of this submission.

Yours faithfully,

Signed.....
