

Guiding Australian Tenants to smart renewable energy.

Tenants can now access cheap solar energy on their rental property with the upfront solar system costs fully funded by their landlord.

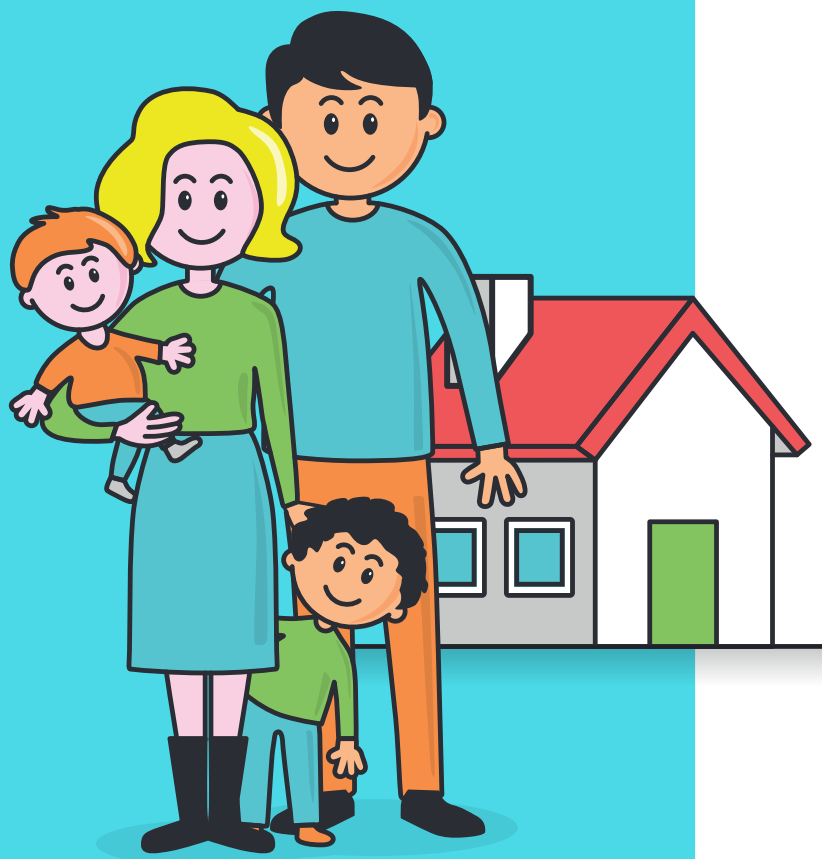

Save and enjoy the benefits with Smart Solar and Beat Energy™.

Let our team show you how you can save money on your energy bill and finally access solar energy with our Smart Solar System powered by Beat Energy™.

Beat Energy™ is all about helping you take back power from the big energy retailers.

We're here to ensure tenants can finally get access to cheap renewable energy. At Beat Energy™, we focus on bringing energy fairness and equality back to our community.

FOR TENANTS

The energy market has been unfair to tenants for decades. Tenants have largely been left out of the solar revolution and the savings that come with it, until now.

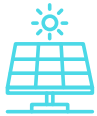

Through Beat Energy™, your landlord will fund the upfront cost of the Smart Solar System and you will gain access to the solar energy generated at cheaper prices than what you pay from the energy grid today.

Delivering you a cheaper and greener source of energy for you and your family. At Beat Energy™, we're making sure we all get to share in the green energy revolution.

Discover the Beat Energy™ difference

Beat Energy™ offers both residences and businesses innovative solutions to be a part of the energy market disruption. With extensive industry knowledge and expertise, Beat Energy™ will tailor the optimal energy solution for you. We understand your energy needs are unique to you, your family and business. We are 100% Australian owned and want to be part of your energy journey.

WE ARE TRANSPARENT

Navigating you through a complex and quickly evolving energy market.

LEADING DISRUPTION

Be part of the energy market disruption, not a victim of it.

TAILORED SOLUTIONS

We don't believe in one size fits all. Energy solutions are tailored to suit your lifestyle.

100% AUSSIE OWNED

Innovation for Australians, by Australians.

It's great to finally have access to solar energy as a tenant!

For years our family has been wanting to get solar energy, but as we don't own the property and our landlord couldn't see a way to pay for the solar system and get it paid off, we had to put up with high energy bills. Now we have finally got access to solar energy and Beat Energy gives us all the information we need to really make the solar system work for us.
