To whom it may concern,

RE: Keep Woodside Mine Free

I am a local Adelaide Hills Resident, Director of GE Hughes Construction Co., Co-Owner of Everglade Black Angus Stud and land owner.

I wish to express my concerns about the Terramin proposing to blast underground twice a day, every day!!

In our local area the water comes from a fragile network of underground aquifers which will cause irreversible damage with blasting. The threat to the water is a threat to the horticulture and grazing properties in this region. Many local properties grow various forms of produce, grapes being the majority. Also heavily relied upon for good Stock Water. Some of these are very sensitive to changes in water quality and supply.

There are many hardworking local folk who depend on the reputation that the thriving agricultural community provide from the Adelaide Hills. South Australia is also internationally well known for producing some of the best produce right here in the Adelaide Hills.

This includes the award winning Bird In Hand Winery, which I have personally been privileged to be involved with the building and development of for many years. With Bird In Hand Wineries projected plans for the future my construction business will rely upon these plans moving forward.

Without prejudice,

Duane Hughes

Director.
