Soil Quality Outcome

1. The Tenement Holder must ensure the soil profile and function is restored and capable of supporting the future land use agreed by the Director of Mines or other authorised officer.

Heritage Outcome

2. The Tenement Holder must, during construction and operation, ensure there is no damage, disturbance or interference to Aboriginal and non-Aboriginal heritage sites, objects or remains as a result of mining related activities unless it is authorised under the relevant legislation.

Native Vegetation Outcome

4. The Tenement Holder must ensure there is no loss of abundance and/or diversity of native vegetation on or off the Land through clearance unless a significant environmental benefit has been approved in accordance with the relevant legislation.

Explanatory note: The legislation that applies to this environmental outcome is the Native Vegetation Act 1991.

Ecosystem and Landscape Function Outcome

5. The Tenement Holder must ensure the post completion ecosystem and landscape function is resilient, self-sustaining and indicating that the pre-mining ecosystem and landscape function will ultimately be achieved.

Weeds and Pests Outcome

6. The Tenement Holder must, during construction, operation and post completion, ensure no introduction of new species of environmental weed, plant pathogens or pests (including feral animals), nor sustained increase in abundance of existing weed or pest species on the Land.

Surface Water Outcome
