Subject: Rex Minerals

Dear Sir.

As we are involved with farming land near the mine site, I would like a bit more time to think about what the situation is with all this land you propose to put the overburden on. What a waste of the best cropping land in South Australia.

Please put the over burden back in the hole.

If the cost is so prohibitive, think about the farming land that you will destroy and the cost of loosing some of the best productive land in our state.

Hands off Yorke Peninsula for mining.

Helen Eden.
