Subject: Woodside mining proposal

I am thoroughly disgusted that the government is purposing a mine in the Woodside area (or any area for that matter).

The damage, no matter how many environmental planning studies etc are done, does NOT out way the damage, risk to environment & risk to native flora & fauna in the area! Once damaged it cannot be undone - no matter what any reports say.

We also keep sucking the life out of our planet, for commercial gain!

Damaging its delicate systems & continuing to add to climate change issues - STOP!

This area is beautiful.

It is also a fabulous tourist & wine growing region that supports jobs & industry in a thoughtful way.

Community is strong - far more valuable than your mining proposal!

I want this stopped before ever going ahead.

Government works for the people, we PAY the wages & its time we are listened to.

Thank you
April Berry.
