Submission details

Issue	Our primary production business operates within a 5km radius of the proposed site of the gold mine. We are concerned our water quantity and quality will be affected by the drawing of water at such a deep level. Any decrease in water will have a massive effect on the orchard and its ability of continuation.
Reference and page number (if known)	
Comment	
Additional comments	Drawing water from a fractured rock aquifer is unpredictable, as is the recharging of water. I do not support the proposed gold mine going ahead.
