Subject: Proposed Woodside Gold Mine

To whom it may concern,

I am writing this email to plead with you, and those in a decision making capacity, to take a long view of the situation of allowing a gold mine at Woodside, rather a view that promotes short term gain at the expense of nature and soul defining considerations. Looking at the global situation we see the results of greed and a lack of soul in decision making. Consider for a moment that there are people living in a tall building. The people living on the lower floor see the world as a carpark and maybe a small garden; people living on the middle floor see more and maybe another town and shopping centres, schools and hospitals where other people live and have lives just like their life; the people in the top of the building see a greater landscape which may take in the ocean or a distant lake, beautiful mountains and the setting and rising sun. A Cosmic view of life on earth is that we are all souls having a physical experience and co-creating with the Universal Mind which some call God. My grandchildren understand that we are not 'alive' but we are 'life' and as 'life' we are one with everything else that has life – plants, flowers, trees, people from different races and cultures etc. Do consider working towards making this planet (and in particular Woodside in the beautiful Adelaide Hills) a place where 'life' is respected and protected!

With gratitude for your consideration,

Joy Nugent
