Title	█
Given name	██████
Family name	██████
Email	████████████████████
Submission date	30/08/2019
I understand that my submission will be published on the DEM website and provided to the applicant, but I require that the government withholds my name and contact details. I understand that it is my responsibility to ensure personal information is not included in the body of my submission, any footers or headers or any attachments	checked

Submission details

Issue	Ground water
Reference and page number (if known)	
Comment	<p>If assurances can't be made that the ground water will not be affected, this project can not go ahead. To many industries and local businesses rely on this resource. Which for some is the only way they get through drought times.</p> <p>Tourism in Woodside will be greatly affected if the wine region is hurt by loss or affected ground water.</p> <p>In the conversations I have had with terramin staff, at no point are they trying to fully understand or avoid these ground water systems. They plan on grouting and pushing on which will leave the NATURAL WATER COURSE to be affected indefinitely. This to me and should be to everyone involved unacceptable.</p>
Issue	Validity
Reference and page number (if known)	

Comment	<p>This is a mine with high risk and low reward. The risk to water for only \$150 million of gold is not reasonable.</p> <p>Also gold is a resource that is not needed to keep Australia moving forward.</p>
Issue	The future
Reference and page number (if known)	
Comment	<p>If one mine is allowed in the pristine Adelaide Hills, then what is stopping more from being approved in years to come.</p> <p>This will destroy everything we stand for and have spent many years trying to build.</p>
