Subject: Woodside Mine Proposal

To whom it may concern:

I am very concerned about the proposed gold mine in Woodside. The South Australian hills region is world famous for its pristine air and soil. The damage this mine will do to our air quality, noise pollution, wildlife, tourism industry and local business is not to be taken lightly, and concerns about this are not exaggerated. I have worked for Jurlique for over 10 years, a fantastic global brand that is locally produced. I know that one of the big appeals for our brand is the environment in which it is grown. Anything that jeopardises so many companies and jobs should not go ahead. This is a shortsighted plan, promising only short term gains and resulting in long term problems.

Please do not approve this proposal. Too much will be lost, that can never be regained.

Thank you.
Jo
