**Subject:** Woodside & proposed mines

Hello

I am Adelaide hills resident and I am against having a mine not only in the proposed Woodside site but also the Lobethal, Gumeracha, Birdwood and Mount Torrens sites.

This area is a food bowl. At a time of great change that is happening to our climate and with water issues getting bigger and more worrying every year, the time for ignoring our environment is behind us.

What has been developed in the Adelaide Hills as an area of food production should never be allowed to be threatened. It should be protected. If we don't have water, clean water and food to eat what good is all the millions of dollars that are made. Jobs can be created in other industries. The economy can grow by looking at what the people, the community require now, looking to the future not just a quick money maker.

Support industries that support the community.

We do not now want this for us or our children or the future generations .

Our environment is important to keep healthy , look around you at climate change , it's too late to fix it , we can modify the damage and prevent future damage if we act now .

Why would we continue to destroy the earth ? Are you one of the elite that can buy anything? anyone ? Food ? Water?

Then you are in the 2%

Please listen to the people. The people that grow the food and keep communities together.

Gemma Green
