I understand that it is my responsibility to ensure personal information is not included in the body of my submission, any footers or headers or any attachments	checked
Submission details	
Issue	Water, Trucks, Lighting, Noise, Environment and Tourism.
Reference and page number (if known)	

<p>Comment</p>	<p>It is with utmost concern that after this meeting no one knows how this mine is going to affect the water table. Once this water has gone it will cause a serious problem to the area and the govt. will be to blame. No one else! It will be a huge disaster for everyone in SA and the ramifications will be worldwide. The amount of double trucks on roads are dangerous and slow up traffic in hilly areas. The lighting will throw a huge glow over the area which again is causing angst to locals who live in the area. The blasting for locals 25/7 is a shocking thing for them to have to put up with causing stress and ruining their way of life . The area is known for its beautiful environment and green lifestyle with vineyards, restaurants and farming life. I believe in mining but other mining companies have enough gold to supply the world for years but don't flood the market. This is just pure greed. It is deplorable and may be an environmental disaster and once that happens this beautiful area is destroyed. Repeat not one person know what is going to happen to the water table so to me that is enough to stop this mine!</p>
<p>Additional comments</p>	<p>No Mine. Do not destroy this pristine environment for greed. Look after our water. Just stop this foolhardiness!</p>
